Be There Now!

Overview

Be There Now! is an interactive system that allows multiple users to view themselves within digital landscapes, works of art, etc. In addition, users are able to take snapshots of themselves and send them via e-mail. Be There Now! has been installed in many public spaces in the domain of art, culture and information (e.g., museums, airports, tourism information offices, exhibition spaces, even on an electric van) and has been used from thousands of people, constituting an attraction for young and old.

The implementation of this system involves computer vision technologies for the users’ background removal and image acquisition.

Target Domains

The system comes under the domain of info-tainment, which combines information and entertainment, while it is targeted mainly for use in public spaces.

An additional area of application is the field of advertising, as the content of the system can be suitable for promotion of any type of products.
