Peridexion

Overview

Peridexion is a system that offers users the possibility of exploring an object and/or a subject in depth. The system has a touch screen that presents a view of an object at a time. Visitors can select the object or the view they wish to see and then discover points of interest and relative multimedia information, or zoom in on any detail at will.

Additional Information

The system can be used in any cultural heritage or commercial context.

Permanent public installations:
- Archaeological Museum of Thessaloniki, as part of “Macedonia: From fragments to pixels” exhibition www.makedonopixels.org
- Holy Metropolis of Gortyna and Arcadia, Tourism Information Center, Moires
