

Job Title : Research Scientist

Job Description :

Tandent Vision Science, Inc. is seeking experts in computer vision, optimization, and/or machine learning to join our talented research team. As part of Tandent Vision Science you will work on academic-quality research combined with real-world product development (and real-world impact). Moreover, you will be backed by the financial resources of industry, the potential upside of a well-grounded start-up, great pay and benefits, generous stock options, and passionate and supportive colleagues across multiple locations.

Tandent Vision Science was founded in January 2005 to solve fundamental problems in computer vision with the goal of making computer vision systems more commercially practical. To realize this goal, we are focused on understanding and leveraging the effects of illumination in still and video imagery. We have multiple offices throughout the United States, an enthusiastic team of core researchers (including 6 Ph.D.'s), and collaborations with world-renowned partners in academia. More information is available on our web-site: <http://tandentvision.com>.

Specific requirements for this position include,

- * Ph.D. in computer vision or related field (or MS with equivalent experience)
- * Background in machine learning and optimization
- * Experience with C++ and Matlab
- * Ability to identify problems and set research goals
- * Self-motivated
