

## Job Opening

# Computer Vision Researcher

Toshiba Research Europe, Cambridge, UK

Toshiba Research Europe is looking for a researcher to join its Computer Vision Group.

**Required** : You have a PhD in computer vision, machine learning or a related area, a solid theoretical background and a strong international publication record. You are keen to try out and implement new ideas. Post-doc or industrial experience is also welcome.

**About us** : The CRL Computer Vision Group is a young international and dynamic team. Established in 2006, we are creating Toshiba's core computer vision technology while carrying out basic research in close collaboration with the University of Cambridge.

**Position** : You will be pursuing research in computer vision, in particular in the areas of structure from motion and 3D reconstruction. Scientific publication of your work as well as collaboration with the University of Cambridge will be encouraged.

Post-Doc and permanent positions are available.

**How to apply** : Applicants should send a CV, the names and contact details of three referees to: [cvgjobs@crl.toshiba.co.uk](mailto:cvgjobs@crl.toshiba.co.uk)

Inquiries can be sent to the same email address.

**Applications are welcome until the position is filled.**
