Scientific & Technical Advisor

Developed the curriculum for the undergraduate level courses at the Department of Applied Information Technology & Multimedia in the Technological Educational Institute in Crete, Greece for the systems courses (1999-2000)

SOFTWARE DEVELOPMENT

- Developed 7DS a novel peer-to-peer information discovery mechanism for mobile devices. 7DS has been integrated with several applications. Research groups world-wide have expressed their interest in this project.
- Collected extensive real-life traces from large-scale wireless infrastructures. A significant part of these data, models for wireless traffic demand and statistical analysis scripts are available to the [research community via the joint UNC/FORTH repository of traces and models for wireless networks](#). More than **110 registered users worldwide**.
